

## Mathematics Intensive Course

Mathematical skills are a basic requirement for solving problems in many economics and business administration subjects. No matter whether you are dealing with market research, financial problems, logistics issues or economics – basic mathematical skills are always an essential factor for successful studies.

The Mathematics intensive course consists of 20 lessons to be held on five days before the program start. The course objective is to provide future Bachelor students with the necessary level of mathematical skills for the International Business study program at MBS. Students will work in small groups in an intensive and interactive course. The course use examples and exercises to eliminate any deficits in the students' mathematical skills. Thereby, the teaching of the lecturers shall place special emphasis on clear and comprehensible presentation.

Among others, the course will deal with the following topic areas:

- ✓ Elementary Algorithms
- ✓ Fractions, binomial formulas, potencies, roots
- ✓ Logarithms
- ✓ Indexing and sums
- ✓ Financial mathematics
- ✓ Differential calculus with one more variables
- ✓ Integral calculus

All lecturers are experienced teachers with a background in economics and business administration, who always pay attention to the practical component. They possess extensive practical experience and also teach within the regular academic program at Munich Business School.
